NEXUS

User Manual

Your voice assistant that can use your whole phone.
What you can say, how to say it, and how to get the most out of it.

Version 0.4

What is inside

1. Start here: set up in 5 steps
2. How NEXUS understands you
3. The floating bubble
4. Every command, by topic
5. Long commands: do many things at once
6. Teaching NEXUS your daily tasks
7. Stop, fix and undo
8. Settings explained
9. If something does not work
10. One-page cheat sheet

> **TIP** You do not need to memorise anything. Speak the way you normally talk, in English, Hindi or Hinglish. The commands in this manual are examples. NEXUS understands many other ways of saying the same thing.

1. Start here: set up in 5 steps

Do this once. It takes about 10 minutes, plus the download time of the phone brain.

1

Install the app

Download nexus.apk from your GitHub link, tap it, and allow installs from your browser if Android asks. If you are updating, uninstall the old NEXUS first.

2

Give the permissions

Open NEXUS. Tap **Allow** on each item in the setup list. The most important one is **Phone control**: turn on *NEXUS phone control* in Accessibility settings. If the switch is grey, go to Settings, Apps, NEXUS, tap the three dots at the top right, choose **Allow restricted settings**, then try again.

3

Download the free phone brain

Open NEXUS, tap **Settings**, then under Phone brain tap **Download Fast** (about 550 MB, use Wi-Fi). When it says Ready, tap **Test the phone brain** to check it works.

4

Show the bubble

Tap **Show bubble** at the top of the app. A purple circle with an N appears and stays on top of every app.

5

Say your first command

Tap the bubble. When it turns **green**, say: **"Open Instagram"**.

TIP The first time you use each feature, Android may ask for one more permission (for example Do Not Disturb for silent mode, or notification access to read messages). Allow it once and it will not ask again.

2. How NEXUS understands you

NEXUS does not need exact words. It follows a few simple rules, in this order, so you can predict what it will do.

If you...	NEXUS will...
1. You name an app **"Open Instagram"**	NEXUS opens that app directly, from any screen. It will not go searching for it inside the app you are in.
2. You name something you can see **"Open the Family group"**	NEXUS looks at your screen first and taps what you named. This works for chats, groups, songs, videos, buttons and menu items.
3. You give a command but no app **"Send I will be there in 10 minutes"**	NEXUS does it right where you are: the open chat, the open video, the open text box. This works in every app.
4. You mention something not on screen **"Open the fifth video"**	NEXUS scrolls down a little to find it. Phone jobs (alarms, torch, calls) are done directly.

Ways of talking that all work

You can say	Meaning
"Open Instagram" **"Please open Instagram"** **"Instagram kholo"** **"Take me to Instagram"**	All mean the same thing. Polite words, filler words and speech mistakes are ignored.
"insta pe reels dikha yaar" **"pehla video chalao"** **"wifi band kar do"**	Hinglish with the verb at the end is understood too.
"Take me back" **"Go back please"** **"Ab pichhe jao"**	All press Back.

TIP Short beats long when you are in a hurry. "Like it", "next", "send ok" are enough because NEXUS already knows where you are.

3. The floating bubble

The bubble stays on top of other apps so you can talk to NEXUS from anywhere. Its colour tells you what NEXUS is doing.

Colour	Meaning
Purple	Ready and waiting.
Green	Listening to you. Speak now.
Yellow	Thinking about what you said.
Light purple (three dots)	Working on your task.
Blue	Speaking an answer.
Orange	Paused, or waiting for your answer to a question.
Red ring	Watching you do a task so it can learn it (see Chapter 6).

What you can do with the bubble

Do this	Result
Tap once	Start or stop listening.
Press and hold	Stop everything NEXUS is doing, and stop it talking.
Tap twice quickly	Open the full NEXUS app.
Drag it	Move it anywhere on the screen.
Tap the small red X on it	Close the bubble.
Drag it to the bottom of the screen	A red box appears. Let go to close the bubble.
Say "Hide the bubble"	Closes the bubble by voice. Open NEXUS and tap Show bubble to bring it back.

4. Every command, by topic

Say any line in the left column. The line in the right column is what happens. Where a name or word is in **CAPITALS**, replace it with your own (for example a contact, a song or a search).

Apps and moving around

You say	What NEXUS does
"Open YouTube"	Opens the app. Works with short names too ("insta", "yt", "wa").
"Go back" / "Go back twice"	Presses Back once or more.
"Go home"	Goes to the home screen.
"Show recent apps"	Opens the recent apps screen.
"Switch to the previous app"	Jumps back to the app you used before this one.
"Open settings" / "Open wifi settings" / "Open battery settings"	Opens that Settings page.
"Close this popup"	Taps Close or Not now, or presses Back.
"Take a screenshot"	Takes a screenshot.
"Lock the phone"	Locks the screen.
"Open google.com"	Opens that website.

Reading and understanding the screen

NEXUS can see what is on your screen, even in apps it has never met.

You say	What NEXUS does
"What is on my screen?"	Tells you which app you are in and what it shows.
"Read this page" / "Read it out loud"	Reads the text on screen aloud.
"Find the search button"	Tells you where it is on the screen.
"What does this button do?"	Explains it. Works best with the optional cloud AI.

Tapping, scrolling and typing (in any app)

You say	What NEXUS does
"Tap SUBSCRIBE" / "Click the share button"	Taps what you named. If it is not visible, NEXUS scrolls down to look for it.
"Long press the photo"	Presses and holds it.
"Open the second result" / "Open the last one"	Taps that item in the list on screen.
"Scroll down" / "Scroll up" / "Scroll to the bottom"	Scrolls the screen.
"Swipe left"	Swipes across the screen.
"Type do it later"	Types the words into the open text box. It does NOT send.
"Send do it later"	Types the words and presses send. Works in Claude, ChatGPT, WhatsApp, Telegram, any chat.
"Send" / "Send it"	Presses send on what you already typed.
"Copy this" / "Paste"	Copies or pastes text.
"Share this"	Opens the share menu.

YouTube

You say	What NEXUS does
"Search FILMMAKING on YouTube" "YouTube pe FILMMAKING dhundo"	Opens YouTube and shows the results straight away.
"Open the first video" / "Play the second video"	Opens that video. Ads are skipped.
"Open the first short" / "Doosra short chalao"	Opens that Short.
"Go to Shorts" / "Next short"	Opens Shorts or moves to the next one.
"Like it" / "Unlike it"	Likes or removes the like. It never double taps by mistake.
"Subscribe" / "Unsubscribe"	Subscribes to the channel.
"Save it"	Saves the video to Watch later.
"Open comments"	Opens the comment section.
"Comment amazing video"	Opens comments, types the words and posts them.
"Pause" / "Resume"	Controls playback.
"Skip forward 30 seconds" / "Rewind 10 seconds"	Moves the playback position.

Instagram

You say	What NEXUS does
"Open Instagram and go to Reels"	Opens Instagram and the Reels tab.
"Next reel" / "Previous reel"	Swipes to the next or previous Reel.
"Like it" / "Unlike"	Likes or unlikes the Reel or post.
"Save it" / "Unsave"	Saves or removes it from Saved.
"Follow this account" / "Unfollow"	Follows or unfollows.
"Open comments"	Opens comments.
"Comment nice video"	Opens comments, types the words and posts them.
"Search NASA on Instagram"	Searches in Instagram.
"Open my messages"	Opens your Instagram inbox.
"Message RAHUL on Instagram saying hi"	Opens the chat and sends it.
"Go to home" / "Go to profile"	Switches tab.

WhatsApp and messaging

You say	What NEXUS does
"Open WhatsApp"	Opens WhatsApp.
"Open the FAMILY group" / "Editorial wala group kholo"	Taps that group on your screen.
"Open chat with RAHUL"	Finds and opens his chat.
"Message RAHUL saying I will be late"	Sends the message. If RAHUL has a notification waiting, NEXUS replies from it without opening WhatsApp.
"RAHUL ko bolo ki main late hoon"	Same, in Hinglish.
"Type hello but do not send it yet"	Writes the message and waits. Say "send" when ready.
"Send I will be there in 10 minutes"	Sends it in the chat that is open right now.
"Reply saying thanks"	Replies in the open chat.
"Read my latest messages" / "What did RAHUL say?"	Reads recent messages aloud.
"Send an SMS to RAHUL saying call me"	Sends a normal text message.

TIP If you have two contacts with the same name, NEXUS asks "Which one?" Just say "the second one" or the full name.

Calls and contacts

You say	What NEXUS does
"Call RAHUL" / "RAHUL ko call karo"	Calls him. Asks which one if you have several.
"Call mom"	Works with nicknames you taught it (Chapter 6).
"Call the second number"	Uses the contact's second number.
"Find ANKIT's number"	Reads out the number.
"Video call RAHUL on WhatsApp"	Opens his chat so you can start the video call.
"Redial" / "Call back"	Calls the person you were talking about.
"End the call"	Hangs up.
"Open the dialler"	Opens the phone app.

Phone settings

You say	What NEXUS does
"Torch jalao" / "Turn off the flashlight"	Flashlight on or off.
"Volume 60" / "Volume up" / "Mute"	Sets the volume.
"Brightness 20 percent" / "Brightness up"	Sets the screen brightness. Needs the Modify system settings permission once.
"Silent mode" / "Vibrate mode" / "Sound on"	Changes the ringer. Needs Do Not Disturb permission once.
"Do not disturb on"	Turns Do Not Disturb on.
"Turn off wifi" / "Bluetooth on"	Android does not let apps switch these directly, so NEXUS opens the switch panel. Tap it once.
"Auto rotate off"	Turns auto-rotate off.
"Dark mode on" / "Open hotspot settings"	Opens the right settings page.

Music and media

You say	What NEXUS does
"Open YT Music" then "Play BELIEVER"	If the song is on screen, NEXUS taps it. If not, it searches and plays.
"Play SKYFALL on Spotify"	Opens Spotify and plays it.
"Pause the music" / "Resume"	Controls whatever is playing.
"Next song" / "Previous track"	Skips tracks.
"Play my favourite song"	Plays the song you told NEXUS to remember ("Remember my favourite song is...").

Camera, maps and calendar

You say	What NEXUS does
"Take a photo" / "Take a selfie" / "Record a video"	Opens the camera ready to shoot.
"Navigate to CONNAUGHT PLACE"	Starts Google Maps directions.
"Directions to home"	Same. Teach it first: "Remember that home means YOUR ADDRESS".
"Add meeting with RAHUL tomorrow at 5 pm"	Opens a new calendar event filled in. Check it and tap Save.

Alarms, timers, reminders, notes and maths

You say	What NEXUS does
"Set an alarm for 6:30" / "Wake me up at 7"	Sets the alarm in your clock app.
"Subah 7 baje alarm lagao"	Same, in Hinglish.
"Timer 10 minutes"	Starts a timer.
"Remind me to drink water in 20 minutes"	Starts a labelled timer.
"Remind me to call mom at 6 pm"	Sets a labelled alarm.
"Note buy milk" / "Read my notes" / "Clear my notes"	Quick notes kept inside NEXUS.
"What is 15% of 2400" / "25 times 4"	Calculates instantly, even offline.

Notifications

You say	What NEXUS does
"Read my notifications"	Reads recent ones aloud. Needs Notification access once.
"Open the latest notification"	Opens it.
"Clear all notifications"	Taps Clear all in the notification panel.

Files, email and the web

You say	What NEXUS does
"Open my latest photo"	Finds and opens your newest photo.
"Find the PDF I downloaded yesterday"	Finds and opens it.
"Open Gmail"	Opens Gmail.
"Compose an email to ANKIT about the report"	Opens a new email with the details filled in. Say "send" to send.
"Search for best phones under 20000"	Searches Google.

5. Long commands: do many things at once

Put several actions in one sentence. NEXUS does them in order, checks each one worked, and keeps the context between steps. Use "and", "then", commas, "phir" or "aur" to join them.

You say	What happens
"Open Instagram, go to Reels, next reel, like it, save it, open comments and write nice video"	Eight steps, one sentence.
"Open YouTube, search filmmaking, play the first video, like it, open comments, write amazing video and go back"	Finds, plays, likes, comments, returns to results.
"Open WhatsApp, open the family group and send good morning"	Opens the group and sends.
"YouTube kholo, filmmaking search karo, pehla video chalao aur like karo"	The same idea in Hinglish.
"Open Spotify and play Skyfall"	Two steps.

Follow-ups: talk like you are chatting

NEXUS remembers what you just did, so you can give short follow-ups one at a time:

Follow-ups	Meaning
"Open Instagram" then "Go to Reels" then "Find another one" then "Like this" then "Save it"	Each short command works on the current Reel.
"Message him"	Him is the person you were just talking about.
"Do the same thing again"	Repeats your last request.
"Open the second result instead"	Undoes the last tap and does what you now asked.
"Use the other contact"	Switches to the next matching contact.

> **NOTE** If one step cannot be confirmed (for example a Like button that did not visibly change), NEXUS tells you and carries on with the rest. It never taps the same button twice to "make sure", because that would undo it.

6. Teaching NEXUS your daily tasks

This is how NEXUS becomes yours. Teach a task once, then run it by name forever.

A. Watch me (teach by showing)

1. **Say "Watch me"**

   The bubble gets a red ring. NEXUS is now recording.

2. **Do the task yourself with your fingers**

   Open the apps, tap what you normally tap, type what you normally type.

3. **Tap the bubble and say "Done, call it MORNING"**

   NEXUS saves the steps under that name.

4. **From now on, just say "Morning"**

   NEXUS repeats every step for you.

B. Type a routine in the Routines screen

Open NEXUS, tap **Routines**, then **New routine**. Give it a name, then write one step per line in your own words. Example:

Routine	Notes
Name: good night	Say "good night" any time to run it.
turn off wifi **brightness 10** **set an alarm for 6:30 am** **silent mode**	Each line is one step.

C. Quick shortcuts by voice

You say	Result
"When I say good night, turn off wifi and set brightness to 10"	Creates a shortcut called good night.
"Remember that mom means SUNITA SHARMA"	"Call mom" now calls the right contact.
"Remember that home means YOUR ADDRESS"	"Navigate to home" now works.
"Remember my favourite song is SKYFALL"	"Play my favourite song" now works.
"Forget that..." / "Forget everything"	Removes one memory, or all of them.

D. NEXUS also learns by itself

When the phone brain works out a phrase that the built-in rules did not know, NEXUS remembers it. The next time you say the same phrase it is instant, with no thinking delay. The more you use it, the faster and more personal it gets.

> **TIP** Good routines to try: Morning (open news, set today's alarm), Good night (silent mode, brightness down, alarm), Reached (message family "reached safely"), Study (Do Not Disturb on, open your notes app), Commute (Maps to work, play your playlist).

7. Stop, fix and undo

Say	What happens
"Stop" / "Cancel that"	Cancels what NEXUS is doing right now.
"Wait" / "Hold on"	Pauses. NEXUS holds its place.
"Continue"	Resumes the paused or stopped task.
"That is not what I meant"	Stops, goes back one step, and asks what you meant.
"Undo"	Reverses your last like, save or follow.
Press and hold the bubble	Instant stop with your finger.

> **NOTE** If NEXUS ever hears itself and acts on its own voice, tap the bubble to stop it and turn off Continuous listening in Settings.

Questions NEXUS may ask you

Sometimes NEXUS needs one answer to continue, for example "Which Rahul?" or "What should I say?". Just answer in a few words. It then carries on with the rest of your original request.

8. Settings explained

Setting	What it does
Your name	NEXUS will use it when it greets you.
Phone brain: Download Fast / Smart	Fast (about 550 MB) is quicker. Smart (about 1.6 GB) understands more but is a bit slower.
Test the phone brain	Shows what it understood and how many milliseconds it took.
Use the phone brain	Turn off if you want only the built-in rules.
Quick confirmations	A tick and vibration instead of saying Done. Faster.
Speak replies	Turns spoken answers on or off.

Setting	What it does
Continuous listening	Keeps listening after each reply, so you do not tap every time.
Wake word	In continuous mode, only reacts after you say "Hey Nexus".
Ask before sending messages	NEXUS asks yes or no before it sends. Turn on if you want a safety net.
Cloud AI (Claude), optional and paid	Lets NEXUS chat and answer questions like "What is the weather". Not needed for phone control.

Other screens in the app

Screen	Use it to
Routines	Create, run or delete your daily tasks.
What can I say?	Examples of every command. Tap one to try it.
Memory	See, edit or delete everything NEXUS remembers. You can also switch memory off.
Copy screen info	Copies what NEXUS sees and your recent chat. Paste it to get help when something fails.

9. If something does not work

Problem	What to do
NEXUS says it cannot see the screen	Turn on *NEXUS phone control* in Accessibility settings. If it is greyed out, use Settings, Apps, NEXUS, three dots, **Allow restricted settings**.
The bubble does not appear	Allow **Display over other apps** for NEXUS, then tap Show bubble.
It does not hear me	Allow the Microphone permission. Speak after the bubble turns green. Try a quieter place.
It opens the wrong thing	Say "Stop", then say it again with the exact name you see on screen.
A button was not tapped	Say the button's label exactly as shown, for example "Tap Follow". NEXUS will scroll to find it if needed.
Wi-Fi or Bluetooth did not switch	Android blocks apps from doing this. NEXUS opens the panel; tap the switch yourself.
Silent mode or brightness fails	Allow the permission NEXUS opens (Do Not Disturb, or Modify system settings), then ask again.
It cannot read messages or notifications	Turn on Notification access for NEXUS.
The phone brain will not download	Use Wi-Fi and tap Download again. It resumes where it stopped.
Something is slow	First time a new phrase is used, the phone brain may take 1 to 2 seconds. Next time it is instant. Close heavy apps to free memory.
Banking apps or video apps show nothing	Some apps hide their screen from assistants for safety. NEXUS cannot read them, by design.

TIP Still stuck? Open NEXUS and tap **Copy screen info** right after the problem happens, then paste it to whoever is helping you. It shows exactly what NEXUS saw, which makes fixes quick.

Your privacy

- NEXUS runs on your phone. It does not send your screen anywhere unless you add a cloud key and switch that on.
- The microphone is used only while the bubble is green. The notification at the top of your phone shows when NEXUS is active.
- NEXUS never stores passwords, OTPs or card numbers, and it asks before anything risky.
- You can delete everything it remembers any time, in Memory.
- To switch NEXUS off completely, turn off *NEXUS phone control* in Accessibility settings, or uninstall the app.

10. One-page cheat sheet

Screenshot this page or keep it handy.

OPEN AND MOVE	Open INSTAGRAM | Go back | Go home | Recent apps | Previous app | Screenshot
SEE AND READ	What is on my screen | Read this page | Tap NAME | Scroll down | Open the second result
TYPE	Type TEXT (no send) | Send TEXT (types and sends) | Send | Copy | Paste
YOUTUBE	Search X on YouTube | Open the first video | Open the first short | Like it | Subscribe | Comment TEXT
INSTAGRAM	Go to Reels | Next reel | Like it | Save it | Follow | Comment TEXT | Open my messages
WHATSAPP	Open the NAME group | Message NAME saying TEXT | Send TEXT | Read my latest messages
CALLS	Call NAME | Call the second number | End the call | Redial
PHONE	Torch on | Volume 60 | Brightness 20 | Silent mode | Do not disturb on | Wifi off (opens panel)
MUSIC	Play SONG | Pause | Next song | Skip forward 30 seconds
DAILY LIFE	Alarm 6:30 | Timer 10 minutes | Remind me to X in 20 minutes | Note TEXT | What is 15% of 2400
GET AROUND	Navigate to PLACE | Add meeting with NAME tomorrow at 5 pm | Take a selfie
TEACH	Watch me ... Done, call it NAME | Remember that mom means NAME | When I say X, do Y
CONTROL	Stop | Wait | Continue | That is not what I meant | Do the same thing again | Hide the bubble

TIP Remember the golden rule: name an app and it opens; name something you can see and it taps it; give a command with no app and it acts where you are. Speak naturally.
